EDUCATION

University of Georgia

Athens, GA

B.S. in Computer Science; Minor in Cognitive Science; Certificates in Data Science + Cybersecurity Expected December 2027

- **GPA: 3.84/4.0.** Relevant coursework: Data Structures & Algorithms, Software Engineering, and Systems Programming

EXPERIENCE

Lead Software Engineer, Spotr | spotrcars.com

April 2026 – Present

- Co-founded **Spotr**, a private-seller vehicle sourcing workspace for dealerships, now piloting with **4 dealerships**.
- Built a daily **ingestion pipeline** over 3 sources, using VIN and fuzzy matching on **150+ listings** to cut duplicates **15%**.
- Designed a **0–100 deal-scoring engine** weighing fit, profit, and listing quality into buy/watch/pass recommendations.
- Built the **Next.js** app in **React** and **TypeScript** with **Prisma** over **SQLite**, with **Jest** tests gated by **CI** on every push.

Systems Administrator, Kappa Theta Pi | Athens, GA / Atlanta, GA

August 2025 – Present

- Administered a **Proxmox** host running **20+ LXC containers** and **5 VMs** for the chapter's website, docs, and tooling.
- Migrated SSO from Authelia to **Authentik** for **168 members**, enforcing **SSH key authentication** across all hosts.

Infrastructure Engineering Intern, Shattuck Labs | Durham, NC

August 2023 – January 2024

- Built a **Python** onboarding service on **AWS Lambda** and **API Gateway** that validated roles and assigned access groups.
- Defined **AWS** access as code in **Terraform**, including **IAM Identity Center** permission sets and least-privilege policies.
- Configured **EC2 Auto Scaling groups** on **CloudWatch** metrics, with health checks auto-replacing failed instances.

PROJECTS

Optimus Inventory Health Dashboard | Next.js, TypeScript, FastAPI, SQLite, Docker Compose

- Led a **3-person team** to **2nd place out of 150+ teams** plus an NCR Voyix track honorable mention at **UGAHacks 11**.
- Built the full-stack inventory health dashboard surfacing **stockout risk**, **anomaly flags**, and transfer recommendations.
- Designed a **FastAPI REST** backend with **Pydantic** validation and **SQLAlchemy** services over a **SQLite** data store.
- Containerized the **Next.js** frontend and **FastAPI** backend with **Docker Compose**, enabling one-command setup.

Durable Key-Value Store | Go, Write-Ahead Log, Raft, Linux, LXC, Proxmox

- Built a durable key-value store in **Go** with a **write-ahead log**, calling **fsync** before acknowledging each client write.
- Verified crash recovery through **fault-injection testing** on **LXC containers**, using forced kills and unclean shutdowns.
- Extending the storage engine toward multi-node operation, with **Raft** leader election and log replication in progress.

LEADERSHIP & INVOLVEMENT

SWE Committee Chair & Director of Infrastructure, Kappa Theta Pi | ugaktp.com

December 2025 – Present

- Lead a **10-member** engineering committee, scoping and delegating projects across the chapter's app and website.
- Built backend services, SSO login, and **API** integrations for the chapter's **iOS app**, now used by **96% of members**.
- Ran **TestFlight** beta cycles, reviewed pull requests, and onboarded new developers onto the app and site codebases.
- Cut chapter IT spend by **84%** by replacing paid hosting and email with **self-hosted**, open-source tools in a datacenter.

TECHNICAL SKILLS

Languages: TypeScript, Python, Go, Java, C/C++, SQL, JavaScript, Bash

Frameworks & Libraries: Next.js, React, Node.js, FastAPI, Express, Flask, Prisma, Pydantic, SQLAlchemy, Tailwind CSS

Testing & Databases: JUnit, pytest, Jest, fault-injection testing, SQLite, MySQL, NoSQL key-value stores

Cloud & DevOps: AWS (EC2, IAM, Lambda, API Gateway, S3, CloudWatch), Terraform, Docker, Kubernetes, CI/CD

Tools: Git, Linux, REST APIs, Proxmox, Grafana, Jira
